

Waterproof 12V 1156 3030 24LED+2COB Brake Turn Signal Lights 3156 Dual Color Led Bulb

Basic Information

- Place of Origin: China
- Brand Name: Dalilah
- Certification: ce
- Model Number: 1156/1157-3030-24LED+2COB
- Minimum Order Quantity: 100 pieces
- Price: USD3.0~5.0/ PC
- Packaging Details: 2pc/bag. 2X2X2 cm;0.040 kg;
- Delivery Time: 30 days
- Payment Terms: T/T, Western Union
- Supply Ability: 10000 Piece per Month

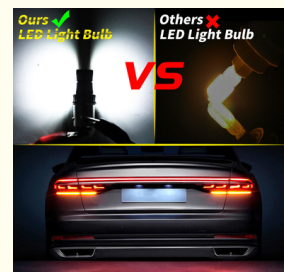

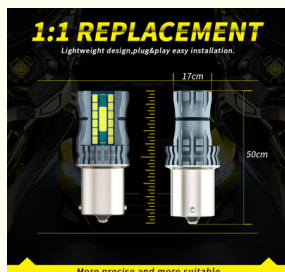

Product Specification

- Car Model: Universal
- Car Fitment: Accurate Cycle Engineering, Alouette
- Voltage: 12V
- Waterproof: Yes
- Type: LED
- Application Temp: -40°C~+85°C
- Lamp Type: 1156/1157-3030-24LED+2COB
- Power: 5W
- Lifespan: 50,000 Hours
- Lighting Angle: 360 Degree
- Led Chip: High Power
- Oe No: 1157/7443/3157
- Weight: 2g

Product Description

Product Description:

Enhance your vehicle's visibility and safety with our top-of-the-line LED Brake Turn Signal Lights, designed to provide a superior lighting solution for drivers seeking to upgrade their existing brake and turn signal system. This innovative product is not just an accessory but a crucial component that can significantly reduce the likelihood of accidents by ensuring that your car is seen by others on the road, no matter the weather conditions.

Our LED Brake and Turn Lamps are universally compatible, making them a perfect fit for a wide range of car models. The universal design ensures that no matter what you drive, you can benefit from the increased safety and visibility that these lights provide. The LED technology incorporated into these lights is not only bright and attention-grabbing but also energy-efficient, drawing less power from your vehicle and thereby reducing the strain on your car's electrical system.

Durability is a key feature of these lights, as they are constructed with high-quality materials that are waterproof. This means that come rain or shine, your LED Brake and Taillight Combo will function perfectly, ensuring your safety is never compromised. The waterproofing also extends the life of the lights by protecting against corrosion and damage caused by exposure to the elements.

One of the most appealing aspects of our LED Brake Turn Signal Lights is the easy installation process. The lights are designed for a seamless and straightforward installation that can be completed in a short amount of time with minimal tools. This easy installation means you can quickly upgrade your vehicle's lighting system without the need for professional help, saving you both time and money.

Longevity is another hallmark of our product. With an impressive lifespan of over 50,000 hours, these lights are made to last. This long lifespan means you won't be replacing your LED Brake and Taillight Combo anytime soon, giving you peace of mind and reducing maintenance costs. The durability and extended life of these lights make them an economical choice for any driver.

The LED Brake Turn Signal Lights emit a bright, clear light that significantly improves the visibility of your vehicle. The LED technology ensures that the lights have an instant on/off response, providing a quicker signal to other drivers when compared to traditional incandescent bulbs. This immediate response time is critical in preventing rear-end collisions, making it an indispensable feature for safe driving.

In terms of aesthetics, these lights offer a sleek and modern look that will enhance the appearance of your vehicle. The design is not only functional but also stylish, adding an element of sophistication to your car. The bright, crisp light emitted by the LEDs also contributes to an updated, high-end look for your automobile.

To sum up, our LED Brake Turn Signal Lights are an essential upgrade for any vehicle owner who values safety, reliability, and style. The combination of universal compatibility, waterproof construction, easy installation, extended lifespan, and improved visibility makes these lights an unbeatable choice for drivers everywhere. Don't compromise on safety or quality; choose our LED lights to ensure that your vehicle stands out and you stay safe on the road.

Features:

Applications:

The Dalilah LED Brake Turn Signal Lights model number 1156/1157 are an essential automotive lighting solution designed and manufactured with the precision and quality assurance that comes from their Place of Origin: China. These LED Stop and Turning Lights are a high-performance product tailored for various occasions and scenarios, ensuring that vehicles remain visible and their signaling intentions clear to other road users, enhancing overall road safety.

One of the primary application occasions for the Dalilah LED Turn and Brake Combination Lights is during vehicle brake operation. The bright LED illumination provides instant recognition for drivers behind, indicating a vehicle is slowing down or stopping. This is crucial in high-speed driving scenarios such as on highways or in heavy traffic conditions, where the reaction time of following drivers is critical to avoid rear-end collisions.

Another scenario where these LED Brake Turn Signal Lights demonstrate their utility is during turning maneuvers. Whether changing lanes or making a turn at an intersection, the model 1156/1157 lights emit a clear and bright signal indicating the driver's directional intentions. This function is particularly beneficial in adverse weather conditions such as heavy rain, fog, or snow, where visibility is compromised. The LED Turn and Brake Combination Lights cut through the poor visibility, alerting other motorists efficiently.

Moreover, the Dalilah LED Stop and Turning Lights are designed for a wide range of vehicles, thanks to their universal Oe No: 1157/7443/3157. This versatility ensures that a broad spectrum of cars, trucks, and motorcycles can be fitted with high-quality LED lighting for enhanced functionality and safety. The plastic material used in the construction of these lights is durable and resistant to various environmental factors, ensuring longevity and consistent performance.

Installation of the Dalilah LED Brake Turn Signal Lights is another key feature, crafted to be as straightforward as possible. Vehicle owners can enjoy the benefits of these lights with minimal hassle, as their easy installation process does not require professional assistance. This ease of installation, coupled with the transformative impact they have on a vehicle's signaling capabilities, makes them

an attractive choice for drivers looking to upgrade or replace their existing lighting systems.

In conclusion, the Dalilah LED Stop and Turning Lights model 1156/1157 are a multifunctional, reliable, and easy-to-install lighting solution for a variety of driving scenarios. Whether used in daily commuting, long-distance travel, or simply to upgrade a vehicle's lighting system, these LED Brake Turn Signal Lights offer superior visibility and safety, confirming Dalilah's commitment to high-quality automotive lighting solutions.

Packing and Shipping:

Ensure that the LED Brake Turn Signal Lights are securely encased in protective packaging to prevent any damage during transport. Utilize bubble wrap or foam padding to absorb shocks and vibrations that may occur during shipping.

Package the lights in a sturdy, corrugated box that is appropriately sized to prevent excessive movement. Fill any voids within the box with additional cushioning materials to keep the lights stationary.

Seal the box with strong packing tape, reinforcing all seams to maintain the integrity of the package. Clearly label the box with "Fragile - Handle with Care" to inform handlers of the delicate contents.

Before dispatching, ensure that the package includes a detailed packing slip listing all enclosed items and any necessary installation instructions or user manuals for the end customer's reference.

Choose a reliable shipping carrier that offers tracking and delivery confirmation services to ensure that the product reaches the customer in a timely and secure manner. Provide the customer with the tracking information as soon as the product is shipped.

FAQ:

Q1: What vehicles are compatible with the Dalilah LED Brake Turn Signal Lights?

A1: The Dalilah LED Brake Turn Signal Lights with model numbers 1156/1157 are designed to be compatible with a wide range of vehicles. To ensure compatibility, please check your vehicle's bulb socket type and compare it with the 1156/1157 model numbers.

Q2: Can the Dalilah LED lights be used for both brake and turn signals?

A2: Yes, the Dalilah LED Brake Turn Signal Lights are multi-functional and can be used for both braking and signaling purposes. Their dual-functionality allows for a convenient single bulb solution.

Q3: Are the Dalilah LED Brake Turn Signal Lights easy to install?

A3: The Dalilah LED Brake Turn Signal Lights are designed for easy installation. They are plug-and-play, meaning they fit directly into your vehicle's existing bulb sockets without the need for additional wiring or modifications.

Q4: How long do the Dalilah LED lights typically last?

A4: LED lights are known for their longevity. While individual usage can vary, the Dalilah LED Brake Turn Signal Lights are built to last and typically provide many hours of operation, often outlasting traditional incandescent bulbs.

Q5: Are the Dalilah LED Brake Turn Signal Lights manufactured with quality materials?

A5: Yes, Dalilah takes pride in the quality of their products. The LED Brake Turn Signal Lights are manufactured in China using high-quality materials and are designed to withstand regular use in a variety of driving conditions.
