Product Description

Product Description:

Introducing our premium quality LED Brake Turn Signal Lights, designed to enhance the safety and style of your vehicle. As a motorist, ensuring that your intentions are clearly communicated to other drivers is paramount, and our LED Stop Turn Tail Lights are engineered to deliver superior visibility and performance. Each bulb in this exceptional LED Brake and Turn Signal Combination emits a bright light, utilizing a low wattage of just 0.8W per bulb, making them an energy-efficient upgrade for your vehicle's lighting system. Operating at a standard 12V, these lights are suitable for a wide range of vehicles and are incredibly easy to install. The lights are crafted from high-quality plastic material, ensuring durability and long-lasting service. The robust construction guarantees that the lights are not only lightweight but also resistant to impact and wear, which is critical for components exposed to the rigors of the road.

The LED Brake and Taillight Combo is designed to fit seamlessly into any 1156 lamp type socket, which is a common size for many vehicles' brake and signal light systems. This universal compatibility ensures that drivers can upgrade their existing lights without any hassle. Moreover, the installation process is user-friendly, allowing drivers to quickly replace their old lights with these modern, high-performance LED lights without the need for professional assistance.

One of the most significant features of our LED Brake Turn Signal Lights is their waterproof design. Yes, you read that correctly – these lights are fully waterproof, which means they are impervious to the elements. Whether you're driving through a downpour or washing your vehicle, you can rest assured that the lights will function flawlessly. The waterproofing also protects against moisture and dust ingress, which can otherwise affect the performance and longevity of the lights.

The LED technology used in our LED Stop Turn Tail Lights offers several advantages over traditional incandescent bulbs. LEDs are

known for their long lifespan, which means you won't have to replace them as often as you would with standard bulbs. They also light up faster, providing other drivers with a quicker response time, which can be the difference between a safe stop and a potential collision. The brightness of the LEDs ensures that your vehicle stands out on the road, whether you're signaling to turn or alerting others with your brake lights.

Our LED Brake and Turn Signal Combination is not only practical but also stylish. The modern look of the LED lights can give any vehicle an updated appearance, complementing its overall aesthetics. They are the perfect blend of functionality and style, making them an ideal choice for drivers who value both safety and appearance. Whether you're driving at night, in fog, or during the day, these lights will ensure that your vehicle is visible and that your signaling intentions are clear to all.

In summary, our LED Brake and Taillight Combo is an essential upgrade for any driver looking to improve their vehicle's lighting system.

With a low wattage of 0.9W per bulb, a standard voltage of 12V, durable plastic construction, compatibility with 1156 lamp types, and a waterproof design, these LED Brake Turn Signal Lights offer enhanced performance, safety, and peace of mind. Upgrade your vehicle's lighting with our reliable and efficient LED lights, and experience the difference in visibility and style.

WIDE APPLICATION

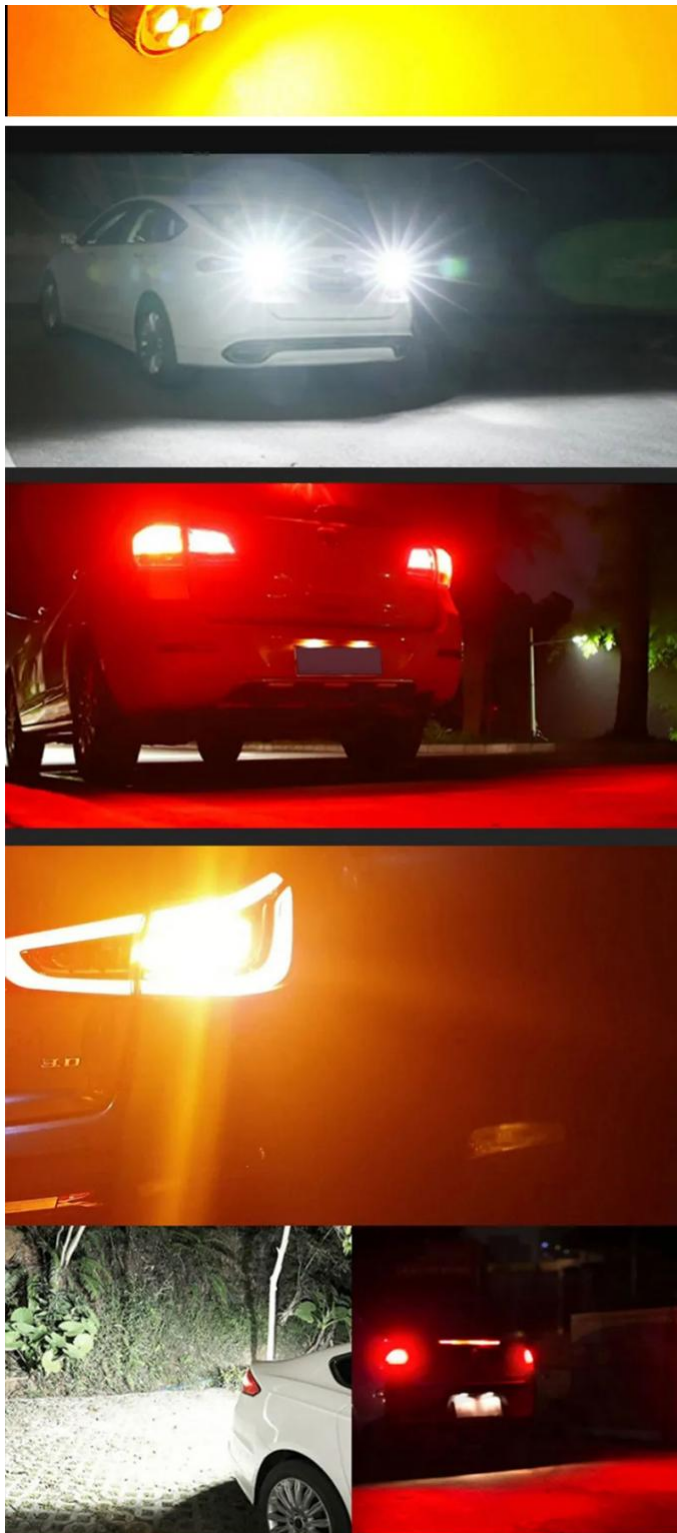

Suit for Turn Signal Lights, Reverse Lights, Brake Lights, Tail Lights

Note: The application varies from different vehicles which means they may not fit all positions on one vehicle.

Applications:

The Dallah LED Brake Turn Signal Lights are a high-quality lighting solution for drivers who prioritize safety and visibility on the road. With the model number 1156/1157, these LED lights are designed to be universally compatible with a wide range of vehicle models. Manufactured in China, these lights are built to meet rigorous standards, ensuring that they perform exceptionally in various driving scenarios.

With a low power consumption of just 0.8W per bulb, these lights are energy efficient. They operate at a standard 12V, which makes them suitable for the electrical systems of most cars without the need for any modifications. The type of light emitted by these LED bulbs is bright and instantly noticeable, which is essential for safety-critical applications such as signaling and braking. Moreover, Dallah provides a 1-year warranty on these LED lights, offering peace of mind and assurance of quality to the consumer.

LED Rear Brake and Turn Lights like the Dallah 1156/1157 are ideal for use in a variety of driving conditions. Whether it's a bright sunny day or a foggy evening, these lights provide excellent visibility to other road users, signaling your intentions clearly when you are coming to a stop or making a turn. This makes them an essential safety feature for everyday commuting, long-distance travel, and even in emergency situations where signaling intentions clearly could prevent accidents.

Moreover, these LED Stop and Turning Lights are designed for easy installation, making them a convenient choice for vehicle owners who prefer to upgrade their car lights themselves. The universal design ensures that they fit a wide range of car models without the need for any special tools or expertise. Whether you're an automotive enthusiast or simply a car owner looking to enhance your vehicle's safety features, these LED lights are an excellent choice.

In addition to their practical applications, the Dallah LED Stop and Turning Lights offer aesthetic benefits as well. The crisp, bright light they emit can give any vehicle a modern and stylish look, distinguishing it from others on the road. Whether you're attending a car show or just cruising through town, these LED lights can enhance the appearance of your vehicle while improving safety.

In summary, the Dallah LED Brake Turn Signal Lights are versatile, energy-efficient, and provide superior visibility for a variety of driving occasions and scenarios. They are a smart investment for any car owner who values safety, style, and reliability in their vehicle lighting.

Packing and Shipping:

Product Packaging:

Our LED Brake Turn Signal Lights are securely packaged to ensure they reach you in perfect condition. Each light is encased in a protective foam sleeve and placed inside a sturdy cardboard box. The box is then filled with additional padding materials to prevent any

movement during transit. Clear labeling on the outside of the box identifies the product inside and includes handling instructions to safeguard the lights against potential shipping hazards.

Shipping:

Your LED Brake Turn Signal Lights are shipped using reliable carriers to provide timely and safe delivery. Tracking information will be provided so you can monitor your package's journey to your doorstep. We take extra care to ensure that your order is delivered promptly and in excellent condition. Please inspect your package upon arrival and report any issues within 48 hours so we can address them swiftly.

FAQ:

Q1: What types of vehicles are compatible with the Dalilah LED Brake Turn Signal Lights?

A1: The Dalilah LED Brake Turn Signal Lights with model numbers 1156/1157 are designed to be compatible with a variety of vehicles. However, compatibility can vary, so it's essential to check your vehicle's bulb size and socket type against the model numbers 1156/1157 before purchasing.

Q2: Can I install the Dalilah LED Brake Turn Signal Lights myself?

A2: Yes, many customers find that they can install the Dalilah LED Brake Turn Signal Lights on their own. These bulbs are designed for a straightforward installation process. However, if you are not familiar with vehicle electrical systems, it might be safer to consult with a professional mechanic.

Q3: Are the Dalilah LED Brake Turn Signal Lights legal for street use?

A3: In most cases, the Dalilah LED Brake Turn Signal Lights are legal for on-road use. However, vehicle lighting regulations can vary by location, so it's recommended to check with local laws to ensure that LED brake and turn signal lights are permitted in your area.

Q4: How long do the Dalilah LED Brake Turn Signal Lights typically last?

A4: LED lights are known for their longevity. The Dalilah LED Brake Turn Signal Lights are built to last for many hours of use. While the exact lifespan can vary depending on usage and conditions, you can generally expect them to outlast traditional halogen bulbs.

Q5: Are the Dalilah LED Brake Turn Signal Lights waterproof?

A5: Yes, the Dalilah LED Brake Turn Signal Lights are typically designed to be waterproof to withstand various weather conditions. However, it is always a good idea to check the specific product details for confirmation of their waterproof rating.
